-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 12 November 2008.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.

**DETAILED ACTION*****Claim Rejections - 35 USC § 102***

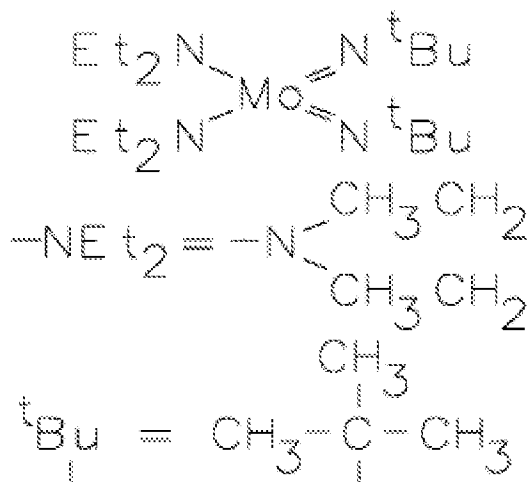

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 59 and 72 are rejected under 35 U.S.C. 102(b) as being anticipated by Sun et al. (US 6,114,242 or US 6,359,160).

The reference discloses the formation of molybdenum nitride (MoN) film by chemical vapor deposition, which involves flowing a precursor bisdiethylamido-bis-tertbutylimido-molybdenum (BDBTM) gaseous compound in a deposition chamber.

The references clearly anticipate the claimed compound.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 60 is rejected under 35 U.S.C. 103(a) as being unpatentable over Sun et al. (US 6,114,242 or US 6,359,160).

The reference differs from the present invention in that the metal of the present formula is Mo instead of W. Because Mo and W are functional equivalent, the same group of the transition metal, therefore, it would have been obvious to those skilled in the art by use of analogous compounds with tungsten in place of ~~molybdenum~~ to arrive at the claimed compound. Also, see lines 18-19 on page 7 of the present specification.

***Claim Rejections - 35 USC § 112***

5. Claims 59-60 and 72 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claims contain subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. There are guidelines in the specification to teach how one ordinary skilled in the art to prepare the compounds those are not excluded in the claims. Those excluded compounds are preferable compounds in the present invention.

***Response to Arguments***

6. Applicant's arguments, see the Remarks, filed 11/12/08, with respect to the rejection in the previous Office action have been fully considered and are persuasive. Therefore, the rejection of EP '595 has been withdrawn. However, upon further consideration, new grounds of rejection are made in the paragraphs 2, 4 and 5 above.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shean C. Wu whose telephone number is 571-272-1393. The examiner can normally be reached on 10:30 AM to 7:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kelly Cynthia can be reached on 571-272-1526. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
